Art Unit: 3751

## **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Joe Nieh on 10/5/06.

The application has been amended as follows:

Cancel non-elected claims 6-62.

Claims 1-5 are allowed.

The following is an examiner's statement of reasons for allowance: None of the prior art, alone or in combination, teaches the Applicant's invention of a sliding piston opening means comprised of a length of the tube with one or more openings, a sliding piston in the tube and a compressible tubular housing, all structured as claimed wherein when the piston is in the second open position, said piston is located at the openings (as shown in Figure 4). It is noted that the piston in the Bonningue reference (as applied in the Final Rejection mailed 3/22/06) is not at the openings when the piston is in the open position (See Figure 3C) but is rather located at a position which is not at (i.e., at the same longitudinal position) the openings.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David J. Walczak whose telephone number is 571-272-4895. The examiner can normally be reached on Mon-Thurs, 6:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Justine Yu can be reached on 571-272-4835. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
